## PROFILE

Hi, I'm Abhishek, a passionate MERN-Stack developer with 6 months of experience in building web applications. I'm proficient in front-end technologies such as HTML, CSS, and JavaScript frameworks like React. Additionally, I have an understanding of back-end development using MongoDB and Express.js frameworks. I enjoy tackling complex challenges and delivering user-centric solutions throughout the development cycle.

## PROJECTS

### *BookStore App*

[Code](#) | [Live](#)

April 2024

React, Node, Express, Monogodb

- Created a web application where we can see only book details, and only authenticated users can see course section.
- Used Axios for API Calls, mongoose for Databases, and daisyUI for Tailwind Plugins.
- Implemented features login, signup and dark mode.
- It is also responsive for both desktop and mobile view.

### *Todo App*

[Code](#) | [Live](#)

February 2024

React

- Created a todo app using only react with fully functional features.
- We can add, delete, update, and mark todos as complete.
- Uses local storage to save todos.
- It is also responsive for both desktop and mobile view.

### *Portfolio Website*

[Code](#) | [Live](#)

December 2023

HTML, CSS, JavaScript

- Created a static portfolio with lots of animations.
- It is also responsive for both desktop and mobile view.
